

**03 FLEXIBLE FITTINGS****Name**

110-122mm Flexible Puddle Flange

**Code**

VFFPF110

**Description**

Puddle Flanges ensure a watertight seal and radon barrier where pipes pass through concrete walls or slabs of any structure or building.

Installed on pipes during construction where water penetration has to be prevented.

Widely used as a radon barrier.

EPDM Rubber with Stainless Steel (1.4301(304))

Clamp Bands.

Watertight to 10bar.
